

# How Do Plants Drink?

LIFE SCIENCES

## Get ready

---

### GET GOING

Observing: Is water in a glass flat?

Provide each 2-4 person team with the following:

- ☐ a cup with colored liquid (e.g. blackcurrant juice)
- ☐ several drinking straws (they should be transparent so that during the experiment the students will be able to see the liquid inside)

Experiment: Second experiment with capillary action

- ☒ **We provide:** exit tickets (one for each student)

Provide each 2-4 person team with the following:

- ☐ vessel full of water
- ☐ tissues, white cotton string, toilet paper, paper towels, dish cloths and a sponge

Observing: Observe a plant stem

Provide each 2-4 person team with the following:

- ☐ stems of flowers or herbs,
- ☐ scissors,
- ☐ a microscope or magnifying glass;
