we measure

write down what you are going to measure

1. Think how to record the information you have collected, so that others could benefit from it.

2. Present the information in a graphical form on this sheet of paper (devise the form in which the data is to be presented on your own).

A large dashed orange rectangle occupies the lower half of the page, intended for a student to draw a graphical representation of their data. The rectangle is defined by a series of small orange dashes forming a border.
