

Why Is the Moon Banana-Like at Times?

EARTH AND SPACE SCIENCES

Get ready

GET CURIOUS

Observing: The distance between the Moon and the Earth

- a volleyball,
- a tennis ball,
- a string (7.5 meters long).

GET GOING

Experiment: Moon phases observed from the earth

- ping-pong balls (one for each group),
- flashlights (one for each group),
- pencils (one for each group),
- a sheet of paper (A4 – two for each group).

GET PRACTICING

Analyzing: Moon Phases Calendar

- We provide:** worksheet
